

PATIENT NAME

Adil

PATIENT ID

P- 92834

CATEGORY

General Follow - up

## VISUAL STRESS MAP

Highlighted areas indicate reported issues.

## Executive Summary

The patient is currently experiencing a range of mild symptoms, including issues related to their dental health such as a root canal and missing tooth, as well as general health concerns like sensitivity, headaches, and chest pain. The patient has scheduled appointments with Dr. Ayesha Khan, a cardiologist, indicating a proactive approach to addressing their health concerns, particularly those related to heart health.

## Clinical Observations

Key clinical observations include dental issues affecting Tooth #2, which has undergone a root canal and is currently missing, and sensitivity in Tooth #15. Additionally, the patient reports experiencing mild headaches and chest pain, which are concerning symptoms that warrant further investigation, especially given the scheduled appointments with a cardiologist.

- Root canal and missing tooth (Tooth #2) with mild severity
- Sensitivity in Tooth #15 with mild severity
- Mild headaches
- Mild chest pain

## Actionable Recommendations

Given the patient's symptoms and scheduled appointments, the following recommendations are made: Attend the scheduled appointments with Dr. Ayesha Khan to assess and address the heart-related concerns. Follow up with a dentist to evaluate the status of Tooth #2 and Tooth #15, considering further dental work or preventive measures. Monitor the frequency and severity of headaches and chest pain, reporting any changes to the healthcare provider.

- Attend scheduled cardiologist appointments
- Schedule a dental evaluation for Tooth #2 and Tooth #15
- Monitor and report changes in headache and chest pain symptoms
