

PATIENT NAME

Adil

PATIENT ID

P- 92834

CATEGORY

General Follow - up

## Executive Summary

The patient is currently experiencing a range of mild symptoms, including issues related to their dental health such as a root canal and missing tooth, as well as general health concerns like sensitivity, headaches, and chest pain. The patient has scheduled appointments with Dr. Ayesha Khan, a cardiologist, indicating a proactive approach to addressing their health concerns.

## Clinical Observations

Key clinical findings include dental issues such as a root canal on Tooth #2 and sensitivity on Tooth #15, both of mild severity. Additionally, the patient reports experiencing mild headaches and chest pain, which are scheduled to be addressed by a cardiologist. The absence of medical documents in the patient's records suggests a need for further diagnostic testing or evaluation to fully understand the patient's health status.

- Root Canal (Tooth #2) - Severity: mild
- Missing/Removed (Tooth #2) - Severity: mild
- Sensitivity (Tooth #15) - Severity: mild
- Headache - Severity: mild
- Chest Pain - Severity: mild

## Actionable Recommendations

Based on the patient's symptoms and scheduled appointments, the following recommendations are made: attend the scheduled appointments with Dr. Ayesha Khan to address concerns related to chest pain and overall cardiac health. Additionally, consider consulting a dentist to address the root canal, missing tooth, and sensitivity issues. Home care should include maintaining good oral hygiene and potentially over-the-counter pain management for headaches and sensitivity, under the guidance of a healthcare professional.

- Attend scheduled appointments with Dr. Ayesha Khan
- Consult a dentist for dental issues
- Maintain good oral hygiene
- Consider over-the-counter pain management under professional guidance
